MORE LIFE PER SQUARE METER WITH HÄFELE

"More life" means more comfort, convenience and functionality. Innovative hardware technology by Häfele makes this possible. The company offers hardware technology that is easily integrated into a manufacturer's furniture design, production and logistics while meeting the consumers' demands for comfortable simplicity.

As a result of the trend to urban living, the furniture industry is facing the large challenge of maximizing shrinking living spaces with multi-functional furniture. This inspiration area with its furniture solutions was a tribute to the current trend of merging living and working in a small space. "More life per square meter" with more comfort and added functionality can become a reality if the furniture that is equipped with Häfele's clever hardware technology is understood as a prototype. In partnership with the clients the most important requirements are identified and prepared for mass applications.
